JavaScript Assignment 2

Note: Kindly submit your assignment on or before 25th July 2026 on Google Drive Link -

<https://drive.google.com/drive/folders/1HF14tbOMfb6sw3Pxs9VOxAlldj6ThMcR?usp=sharing>

Kindly prepare a PDF of the assignment solution. Save the PDF using your Enrollment Number as the file name and upload it to drive line.

1. Write a function `filterpalindrome(arr)` to filter out and return only the palindromes array from the given array.
Ex- Input: ["madam", "racecar", "apple", "level", "hello"]
Output: ["madam", "racecar", "level"]
2. Write a JavaScript function `secondLargest(arr)` that takes an array of numbers and returns the second largest element.
3. Write a JavaScript function `generateOddNumbers(n)` that generates and returns an array of the first n odd numbers, starting from 1, using a loop.
4. Write a function `countVowels` that takes a string and returns the count of vowels (a, e, i, o, u - case-insensitive) in the string.
Ex- "Hello World"
Output - 3
5. Write a function `reverseWords` that takes a sentence and reverses the order of the words while keeping each word intact.
Ex- "Hello World"
Output: "World Hello"

6. Write a function `generateRandomHexColor` that generates a random hex color code and apply it on background on button click.
